Projects

2025 MovieTV

Mobile app built with React Native (Expo) that lets users explore movies, receive AI-powered recommendations, and save favorites. It uses the TMDB API for movie data, Appwrite as the backend, and OpenRouter AI for smart search.

2024 Bookstore System

Development of a Java system with Spring Boot and MySQL. Used Maven for dependencies, and HTML, CSS, and JavaScript for the front-end

2023 PyAutomate

Automation of a registration process on a website using Python
